

Release Notes

These release notes are intended to provide information to administrators and evaluators of the ForgeRock Identity Reporting. All information is accurate at the time of publication and updates will be provided by ForgeRock with subsequent software releases.

Check Security Advisories

Gain insight into security advisories in the community and at ForgeRock.

Before You Start

Learn about the requirements for running Identity Reporting software in production.

Check Doc Updates

Track important changes to the documentation.

Get Support

Find out where to get professional support and training.

Security Advisories

ForgeRock issues security advisories in collaboration with our customers and the open source community to address any security vulnerabilities transparently and rapidly. ForgeRock's security advisory policy governs the process on how security issues are

submitted, received, and evaluated as well as the timeline for the issuance of security advisories and patches.

For details of all the security advisories across ForgeRock products, see [Security Advisories](#).

Before You Start

ForgeRock® Identity Reporting requires the following hardware and software requirements to run in your production environment.

ForgeRock Identity Management

ForgeRock Identity Reporting is designed to work with ForgeRock® Identity Management. Identity Reporting requires the following Docker image for installation.

Table 1: Identity Management Requirements

ForgeRock® Identity Management	7.x or above
--------------------------------	--------------

IMPORTANT

For system requirements, operating system requirements, and java requirements, Identity Reporting requires the same setup as Identity Management does. For more information on Identity Management requirements, see [Before You Install](#).

Documentation Updates

The following table tracks changes to the documentation set following the release of Identity Reporting 1.1.3:

Documentation Change Log

Date	Description
2020-09	Initial release of ForgeRock Identity Reporting 1.1.3.

Getting Support

ForgeRock provides support services, professional services, training through ForgeRock University, and partner services to assist you in setting up and maintaining your deployments. For a general overview of these services, see <https://www.forgerock.com>.

ForgeRock has staff members around the globe who support our international customers and partners. For details on ForgeRock's support offering, including support plans and service level agreements (SLAs), visit <https://www.forgerock.com/support>.

ForgeRock publishes comprehensive documentation online:

- The ForgeRock [Knowledge Base](#) offers a large and increasing number of up-to-date, practical articles that help you deploy and manage ForgeRock software.

While many articles are visible to community members, ForgeRock customers have access to much more, including advanced information for customers using ForgeRock software in a mission-critical capacity.

- ForgeRock product documentation, such as this document, aims to be technically accurate and complete with respect to the software documented. It is visible to everyone and covers all product features and examples of how to use them.
