What's new

IDR 7.1.1

ForgeRock Identity Reporting 7.1.1 contains no new key features or functionality changes.

IDR 7.1.0

ForgeRock Identity Reporting 7.1.0 introduces the following new features and functionality:

Improvements/changes in configuration

- **API as a Data Source and Report Definition**. You can now utilize REST API endpoints as a data source as well as create report definitions.

- **Dynamic Report Parameters**. Dynamic report parameters can be used for any SQL or API report definitions.

- **User Interface Enhancements**. Changes to the user interface to coincide with the current platform user interface.

Security advisories

ForgeRock issues security advisories in collaboration with our customers and the open source community to address any security vulnerabilities transparently and rapidly. ForgeRock's security advisory policy governs the process on how security issues are submitted, received, and evaluated as well as the timeline for the issuance of security advisories and patches.

For details of all the security advisories across ForgeRock products, refer to Security Advisories.

Before you start

ForgeRock® Identity Reporting requires the following hardware and software requirements to run in your production environment.

ForgeRock Identity Management

ForgeRock Identity Reporting is designed to work with ForgeRock® Identity Management. Identity Reporting requires the following Docker image for installation.

Table 1: Identity Management Requirements

ForgeRock® Identity Management	7.0, 7.1, 7.2, 7.3

> **IMPORTANT**
>
> For system requirements, operating system requirements, and java requirements, Identity Reporting requires the same setup as Identity Management does. For more information on Identity Management requirements, refer to <u>Before You Install</u>.

Fixes, limitations, and known issues

This section covers key issues in Identity Governance software, both past, and present.

New fixes in 7.1.1

- IGA-114 - IDR bundle install location
- IGA-1285 - Fix SQL report download from report screen
- IGA-1288 - Uniform pagination across data source types
- IGA-1314 - UI - Display of managed/user objects on form edits showing invalid data
- IGA-1315 - UI - Fix visibility of create definition button
- IGA-1396 - UI - Fix async select of definitions on report schedules search parameters
- IGA-1429 - UI - Definition columns not showing overflow text
- IGA-1536 - Set proper commit and version info in conf
- IGA-1700 - Restrict data source information returned
- IGA-1701 - IGA installer front end directory reference
- IGA-1706 - Add bearer token path and content type for API authentication call

Limitations

Identity Reporting does not support internationalization or multi-language support of any kind.

Known issues

There are no known issues at this time.

Documentation updates

The following table tracks changes to the documentation set following the release of Identity Reporting 7.1.x:

Documentation Change Log

Date	Description
2023-05	Release of ForgeRock Identity Reporting minor version 7.1.1.
2022-05	Release of ForgeRock Identity Reporting 7.1.0.
2020-09	Initial release of ForgeRock Identity Reporting 1.1.3.

Getting support

ForgeRock provides support services, professional services, training through ForgeRock University, and partner services to assist you in setting up and maintaining your deployments. For a general overview of these services, refer to https://www.forgerock.com.

ForgeRock has staff members around the globe who support our international customers and partners. For details on ForgeRock's support offering, including support plans and service level agreements (SLAs), visit support.

ForgeRock publishes comprehensive documentation online:

- The ForgeRock Knowledge Base offers a large and increasing number of up-to-date, practical articles that help you deploy and manage ForgeRock software.

  While many articles are visible to community members, ForgeRock customers have access to much more, including advanced information for customers using ForgeRock software in a mission-critical capacity.

- ForgeRock product documentation, such as this document, aims to be technically accurate and complete with respect to the software documented. It is visible to everyone and covers all product features and examples of how to use them.
